

The Best
is yet to come...

Nadia Liapi

Director, Governance, Risk & Compliance Services

Certified Data Protection Officer (DPO Executive), Certified Information Security Manager (CISM),
ISO 27001 & ISO 20000 Lead Auditor, ITIL Service Operations Professional

www.space.gr

From what happens today...

From diversified – sometimes legacy-technologies...

From missing – often inadequate-security measures ...

From incomplete, fragmented procedures and the lack of policies ...

From employees not aware or trained – even indifferent ...

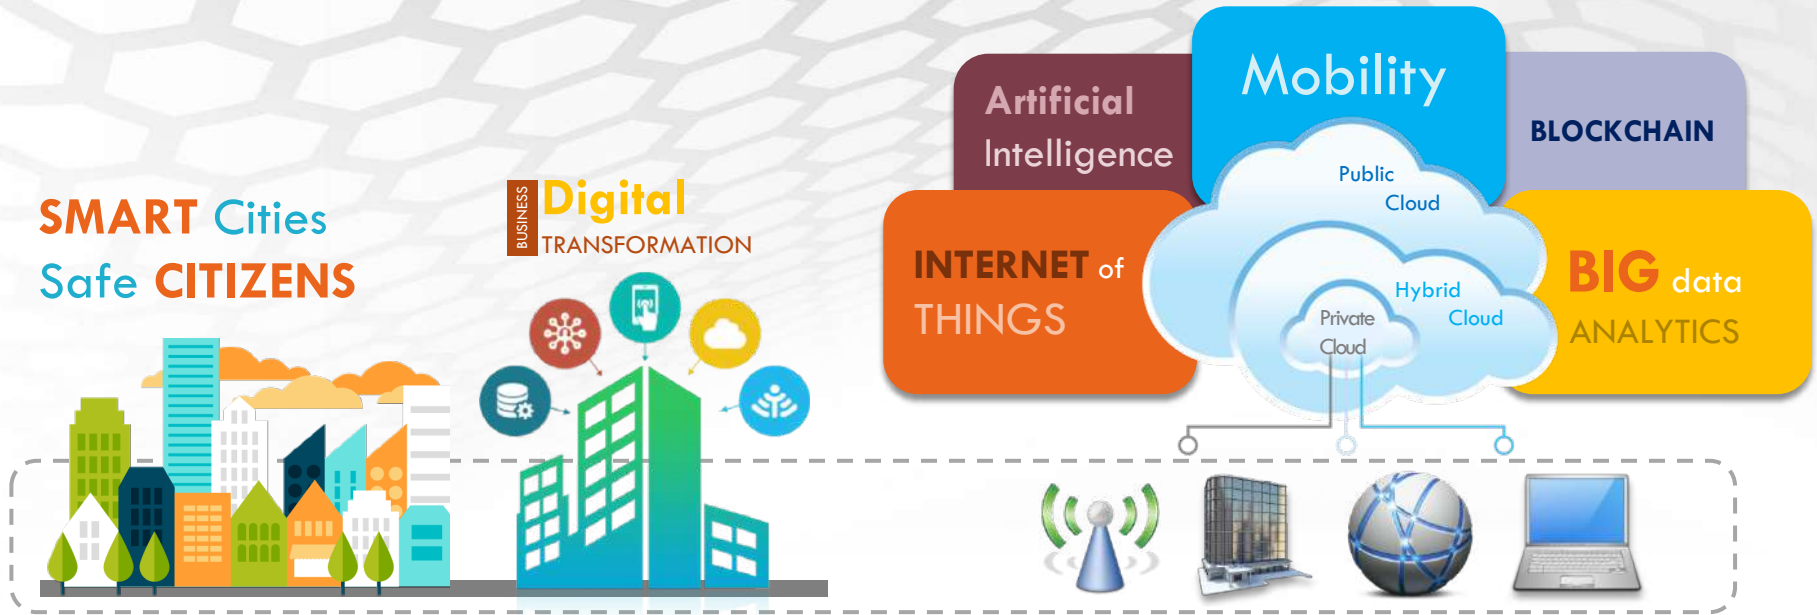

...to the future and beyond

Lessons learned from being:

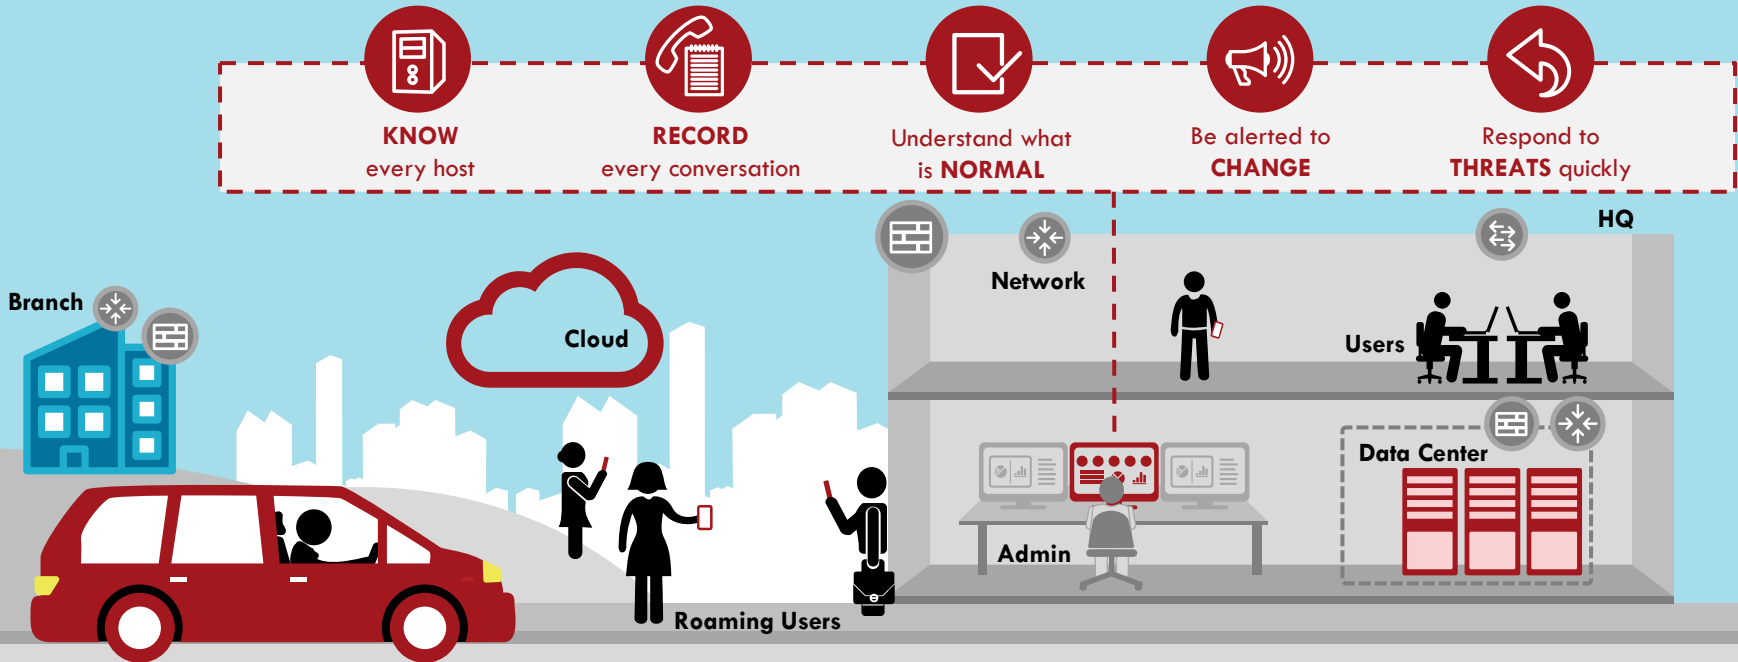

- an information security and data protection consultant
- a DPO to large organizations
- Space Hellas group' CISO

Technology Trends – “The Big Picture”

User/Network Behavior Analytics (U/N BA)

Changes in Security & Compliance

NIS Directive: (EU) 2016/1148

(New Greek law 2018/4577)

E- privacy

GDPR

(technical & organizational measures)

- Element (Device) Management
- Service Management

Space Hellas MSSP Architecture

Policies & Procedures

- Document the organization's commitment to well recognized good practiced
- Promote employees' awareness
- Prove the organization's compliance to rules, regulations, standards

The Human Factor

People Could be part of the solution -not part of the problem - If:

- They are well trained & fully aware
- The appropriate security measures are taken everybody is trained to use implement/use them
- Roles and responsibilities are clear

management

solution

...and the Maestro

The Data Protection Officer (DPO) supervises and coordinates:

- The organization's preparedness for the protection of data
- The implementation of appropriate technical and organizational measures
- Continuous improvement

Food for thought

Data Protection Officer

VS

Information Security Officer

What is their role today? How could their role evolve tomorrow? What is their place to the organization's digital transformation or against the complex compliance environment?

Thank you and always remember

TRUST

takes years to build
seconds to break and
forever to repair...

Space Hellas is your trusted partner
