AgroApps

Moving agriculture forward

AgroApps was established in 2015 with the vision to bring technology closer to the agricultural sector and provide sustainable tools that support modern farming. The company was founded by a team of experienced agronomists, experts in remote sensing and numerical weather forecasting, as well as IT specialists, who had a deep understanding of the agricultural sector and saw the growing need for technological support and for effective forward-thinking IT solutions.

Passionate about applying ICT, AgroApps team uses and combines sophisticated mathematical models, machine learning technologies, satellite and meteorological data and crop development models to build solutions and customized services for farmers, agricultural consultants, agri-food and agricultural insurance companies, as well as for the public sector worldwide. Today, the company has a set of IT solutions that address real life challenges touching upon the benefits of sustainable agriculture and the complex farm management decision-making process.

AgroApps solutions help the agricultural stakeholders protect and improve their operations, guide more informed agricultural decisions and get the most out of their land.

Over those years, AgroApps has established strong partnerships with leading actors of the agri-business sector in Greece. Additionally, the company has managed to deploy a large number of international collaborations with distinct entities, from Ministries and Research Institutions to private companies, co-developing a diverse set of agri-related applications.

Web-IQ
Internet Intelligence

Making the world a better place

Web-IQ is a Netherlands based Technology Company, was founded in 2011 and provides smart solutions to extract intelligence from online data.

To fight online child abuse, trafficking of human beings and fraud, Law Enforcement Agencies and Corporates need the best technology available. Web-IQ has over 25 years of experience in developing internet intelligence solutions for Law Enforcement, Intelligence and Government agencies from all over the world. We use our expertise to support our customers with combating fraud and provide risk intelligence to financial institutions, insurance companies and other high-risk organizations.

We combine our expertise and our proprietary technology in specialised projects to deliver customised on-site solutions for web intelligence. In addition, we initiate and participate in research projects and offer OSINT investigation to support Government, Law Enforcement Agencies, the Military and private industry around the globe.

Law enforcement

We support law enforcement agencies with our forensic web intelligence technology, expertise and unique Darknet data-sets.

Municipalities

We help cities and municipalities to become effective information-driven organisations in order to get a full understanding of the online issues that impact their citizens.

Financial Industry

We provide internet intelligence API's to Anti-fraud, Risk and KYC platforms to improve customer screenings (KYC/ AML / CFT) and combat fraud.

Insurance

We use forensic technology to deliver internet intelligence solutions to improve customer screening for underwriting and combat claim fraud.

Corporates

We provide internet intelligence solutions to provide (cyber) threat and risk intelligence to protect your key assets and help combat fraud.

Innovative IoT Solutions

SenseOne, a member of the SingularLogic Group, is a pioneering company of innovative Internet of Things (IoT) solutions.

SenseOne solutions focus on "Smart Cities", "Smart Industry" and "Smart Buildings". The company designs and implements Internet of Things projects of varying sophistication levels and meets the growing demand for IoT data interoperability through its pioneering SenseOne IoT Platform. SenseOne IoT Platform collects data from different systems' technologies, integrates, and visualizes it, providing actionable insights to optimize resource consumption, reduce costs, increase productivity, and sustainably improve efficiency.

SenseOne's customer base includes Banks, Large Retail Companies, Owners and Construction Companies of Large Commercial and Industrial Buildings, Facility Management Companies, Hospitals, Private Schools, Industrial Park Operators, Industries, Utilities, and Municipalities.
