Netskope enables organizations to move from traditional blocking to safely enabling the cloud
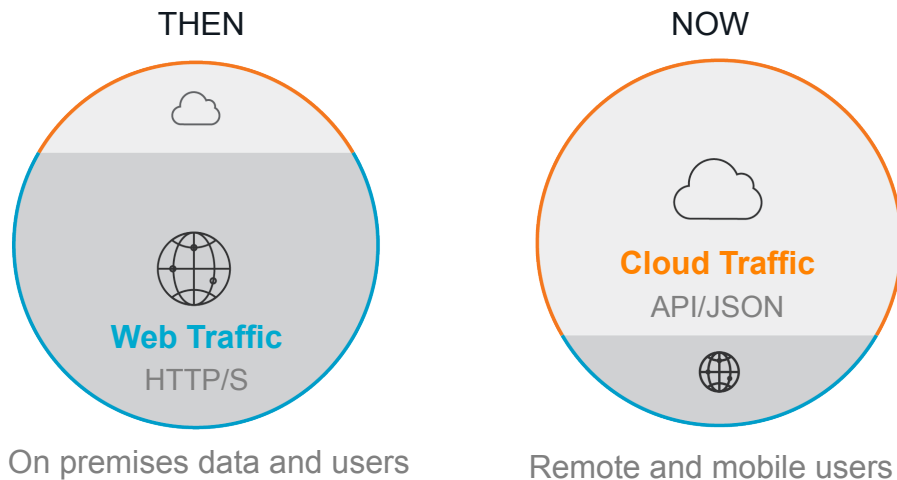

4X Gartner MQ Leader

Recognized for vision and ability to execute

The Network Inversion

Digital transformation is driving network traffic

THEN

Web Traffic
HTTP/S

On premises data and users

NOW

Cloud Traffic
API/JSON

Remote and mobile users

- *Cloud apps and services have overtaken web traffic*

- *84% of traffic is **encrypted***

- ***API/JSON** is new language of the internet.*

The average enterprise uses over 2400 distinct cloud apps

34% of data breaches involved internal actors

1 in 36 mobile devices had high risk apps installed.

53% of companies had over 1,000 sensitive files open to every employee.

83% of enterprise workloads will move to the cloud by the year 2020.
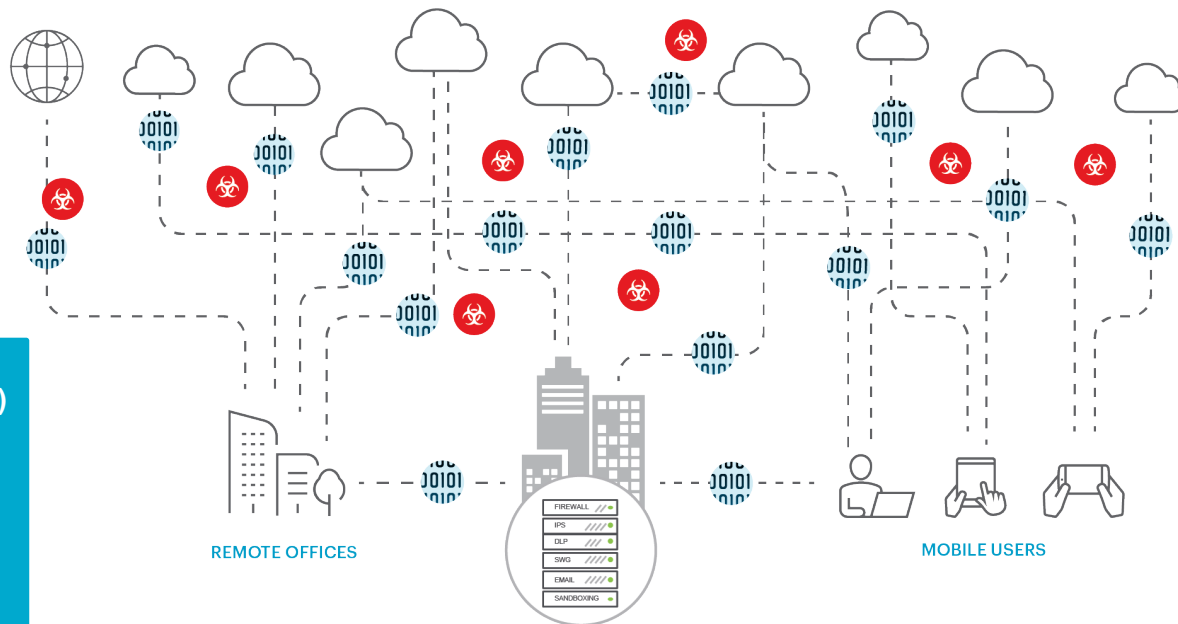

The Inversion Effect: Now

Data and users have dispersed

Cloud Traffic
API/JSON

Web **10%**

SaaS **85%**

IaaS **5%**

↑ **Phishing SaaS/Cloud (36%)**

↑ **Remote Access to Applications**

↑ **Data heavy network traffic**
